

Specifications for digital artwork for REDIPAC® 2ml

The artwork can be provided generally in all common Macintosh formats: All "Postscript" supporting software for Apple Macintosh, preferable in "X Press", "Illustrator" or "Photoshop", but other software as "Freehand" or "PageMaker" can be used too after agreement of the version.

Supply can be done on floppy disc, removable hard disc (44 MB / 88 MB), optical disc (128 MB / 230 MB), "Zip" disc or CD ROM. Simple artwork can be received also by E-Mail under the address label@stella-packaging.de.

All illustrations as well as fonts have to be attached in digital form.

If edges have to be printed, let run the artwork min. 1 mm over outside cutting dimensions.

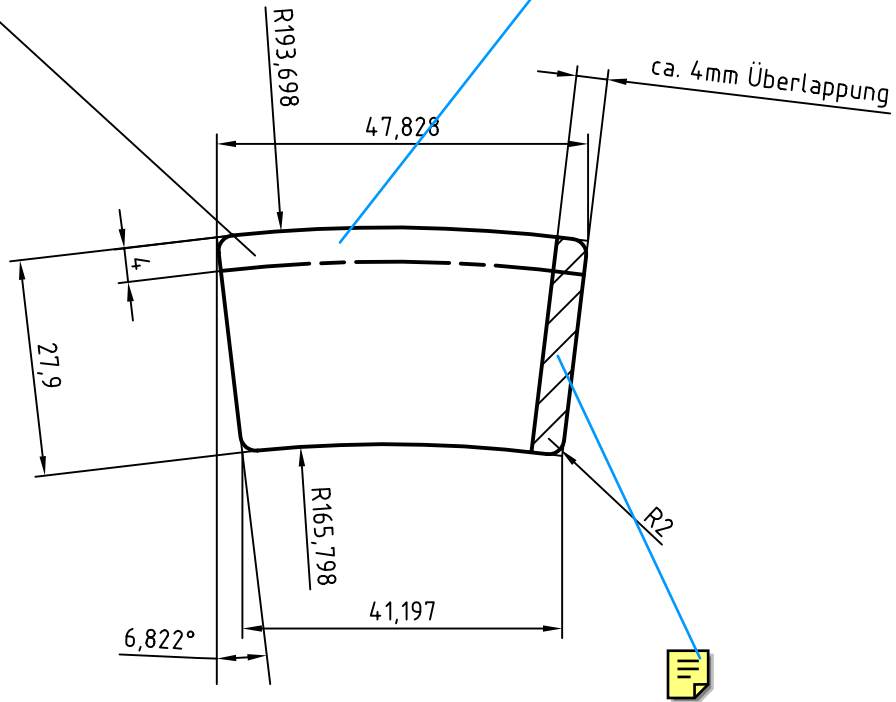

Due to letterpress procedure be aware that dots can spread up to 10 - 15 %, don't reduce screens less than 3 % and add bleeds where needed.

If a registration mark has to be printed you should place the mark in a way that the overlapping ends of the label are centred on the rear of the sealed tube.

The printable area of the label could be taken from the drawing H870004 (enclosed).

Stella Format 1

nicht bedruckbarer Bereich von 4mm
mit Ausnahme der Ausrichtungsmarkierung
